VBM

i-Bougie

The versatile Introducer to facilitate difficult intubation
Shape – Oxygenate – Intubate
**Definition of Difficult Intubation – Cormack & Lehane Grade**

### RANGE OF INCIDENCE

<table>
<thead>
<tr>
<th>Degree of difficulty with intubation</th>
<th>Cormack &amp; Lehane Grade</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>ET intubation successful but multiple attempts may be required</td>
<td>2 or 3</td>
<td>1–18</td>
</tr>
<tr>
<td>ET intubation successful but multiple attempts and/or blades required</td>
<td>1–4</td>
<td></td>
</tr>
<tr>
<td>ET intubation not successful</td>
<td>3 or 4</td>
<td>0.05–0.35</td>
</tr>
<tr>
<td>CICO</td>
<td>0.0001–0.02</td>
<td></td>
</tr>

---

**Features of i-Bougie**

- **Oxygenation**
  - 2 types of O2 Connectors available all the time
  - Allows oxygen flow through the lateral openings at the distal tip

- **Material**
  - Allows shaping of the i-Bougie
  - Low friction surface for easy railroading of the tracheal tube

- **Patient Safety**
  - Atraumatic distal tip
  - Rounded and angled tip with lateral openings

**Indications of i-Bougie**

- To facilitate orotracheal intubation in patients where visualization of the glottis is inadequate

---

**Direct Laryngoscopy**

Studies mention the possibility of orotracheal intubation during the exchange of a Laryngeal Tube.*

**Exchange Technique**

- Allows shaping of the i-Bougie
- Low friction surface for easy railroading of the tracheal tube
- Atraumatic distal tip
- Rounded and angled tip with lateral openings

---

**References:**
Product Specifications

- 14 Fr (for tracheal tube ≥ 6.0 mm I.D.)
- 70 cm length
- Centimetre marking from 5 to 40 cm
- Low friction surface
- With O₂ Connectors
- Sterile
- Single use
