TOURNIQUET SYSTEMS & PRESSURE INFUSION
This catalog includes information of the complete VBM product range for Tourniquet. Whether a medical device is available in the respective market must be inquired.

TOURNIQUETS

• electric
• digital pressure display
• battery back-up system

Pressure Regulation
• microprocessor controlled
• fast cuff inflation and deflation
• regulator knob allows very precise regulation
• limits pressure to max. 600 mmHg

Digital Display
• large color coded LED display is easy to read
• precise measuring shows actual cuff pressure

Battery Back-Up System
• long lasting Ni-MH battery

Flush Button
• to check for bleeding
• for intermittent release of local anesthetic after I.V. Regional Anesthesia

Color Coded Coil Connecting Tubings
• detachable from the device
• with positive locking connectors (PLC)

Automatic Timer
• automatic reset and start after inflation
• automatic stop after deflation with indication of elapsed inflation time
• audible and visual signal every 30 minutes

Alarm System
• visual and audible alarm to detect leaks, pressure deviations and low battery voltage

Tourniquet 8000
• bloodless field

Tourniquet 9000
• bloodless field
• I.V. Regional Anesthesia
• bilateral surgery
• electric
• digital pressure display

**Pressure Regulation**
- microprocessor controlled
- regulation via ± touch pads
- limits pressure to max. 600 mmHg

**Digital Display**
- large LED display is easy to read
- precise measuring shows actual cuff pressure

**Flush Button**
- to check for bleeding

**Color Coded Coil Connecting Tubing**
- firmly connected to the device
- with positive locking connectors (PLC)

**Automatic Timer**
- automatic reset and start after inflation
- automatic stop after deflation with indication of elapsed inflation time
- audible and visual signal every 30 minutes

**Alarm System**
- visual and audible alarm to detect leaks and pressure deviations

**Compact Design**
- small
- lightweight
- handy

Tourniquet 6000
- bloodless field
TOURNIQUETS

• electric
• analog pressure display
• manual back-up system

Pressure Regulation
• fast cuff inflation and deflation
• regulator knob allows very precise regulation
• limits pressure to max. 600 mmHg

Analog Manometer
• no flickering during pressure settings
• always shows the real pressure in the cuff
• precision manometer

Manual Back-Up System
• automatic change to manual system during failure
• maintenance free
• can be used at any time even without power

Flush Button
• to check for bleeding
• for intermitted release of local anesthetic after I.V. Regional Anesthesia
• allows deflation in manual mode

Color Coded Coil Connecting Tubings
• firmly connected to the device
• with positive locking connectors (PLC)

Manual Timer
• countdown function with audible signal
• timer function

## COMPRESSED AIR Tourniquets

- compressed air
- analog pressure display
- manual back-up system

### Pressure Regulation
- pneumatic precision pressure regulator
- fast cuff inflation and deflation
- regulator knob allows very precise regulation
- limits pressure to max. 600 mmHg

### Analog Manometer
- no flickering during pressure settings
- always shows the real pressure in the cuff
- precision manometer

### Manual Back-Up System
- automatic change to manual system during failure of compressed air
- no battery needed
- maintenance free
- can be used at any time even without compressed air

### Flush Button
- to check for bleeding
- for intermittent release of local anesthetics after I.V. Regional Anesthesia
- allows deflation in manual mode

### Color Coded Coil Connecting Tubings
- firmly connected to the device
- with positive locking connectors (PLC)

### Manual Timer
- countdown function with audible signal
- timer function

ROLL-ON CUFFS

allow fast and easy exsanguination within seconds (an alternative to Esmarch Bandage)
reusable, Material: Silicone, Color: transparent

Roll-On Cuff Set, small
complete in case
consisting of:
• Roll-On Cuffs # 1-4
• Hand Inflator with manometer,
  200 mmHg, connecting tube (100 cm),
  positive locking connectors and inflation needle
• measuring tape
• brake-block, large or small
REF 21-95-400

Roll-On Cuff Set, large
complete in case
consisting of:
• Roll-On Cuffs # 3-6
• Hand Pump with manometer,
  200 mmHg, connecting tube (100 cm),
  positive locking connectors and inflation needle
• measuring tape
• brake-block, large or small

**INFUSOR (500 ml / 1000 ml / 3000 ml)**

Pressure Infusion Cuff
reusable

completely transparent
• allows clear view on the fluid bag and the fluid level
• 360° visible

Wrap-Around Design with hook
• fluid bag can be replaced quickly and easily
• consistent pressure on the complete fluid bag

Manometer
• precision manometer
• precise pressure range from 0-300 mmHg

Hand Inflator
• large volume allows quick inflation

Three-Way Stop Cock
• for pressure control
• for quick deflation
reusable
• easy to clean (PU material)
• latex free

DISPO INFUSOR (500 ml / 1000 ml / 3000 ml)

Pressure Infusion Cuff
for single use

Transparent Netting
• allows clear view on the fluid bag and the fluid level

Pocket Design with hanger/hook*
• fluid bag can be replaced quickly and easily

Pressure Gauge
• color coded with overpressure valve
• 360° visible

Hand Inflator
• large volume allows quick inflation

Three-Way Stop Cock
• for pressure control
• for quick deflation

for single use
• reduces the potential for cross-contamination
• latex free

* with hook fastener: Dispo Infusor 500 ml and 1000 ml
with hook: Dispo Infusor 3000 ml

• precise pressure range from 0-300 mmHg

Hand Inflator
• large volume allows quick inflation
• with release valve for pressure control

Reusable

ORDER INFORMATION

with hand inflator, stop cock and color coded pressure indicator
REF 58-02-050 Box 1

with hand inflator and precision manometer
REF 58-08-050 Box 1
PRESSURE INFUSION CUFFS 1000 ml

Pressure Infusion Cuff
reusable

Transparent Netting
• allows clear view on the fluid bag and the fluid level

Pocket Design with Double Hook
• fluid bag can be replaced quickly and easily

Manometer
• precision manometer
• precise pressure range from 0-300 mmHg

Hand Inflator
• large volume allows quick inflation
• with release valve for pressure control

Reusable

ORDER INFORMATION

with hand inflator, stop cock and color coded pressure indicator
REF 58-02-100 Box 1

with hand inflator and precision manometer
REF 58-08-100 Box 1
PRESSURE INFUSION CUFFS 1500 ml

Pressure Infusion Cuffs for irrigation purposes during minimal invasive surgery.

- reusable

Transparent Netting
- allows clear view on the fluid bag and the fluid level

Design
- pocket design with hook

Manometer
- precision manometer
- precise pressure range from 0-300 mmHg

Hand Inflator
- large volume allows quick inflation
- with release valve for pressure control

- reusable
- bladder is replaceable

PRESSURE INFUSION CUFFS 3000 / 5000 ml

Pressure Infusion Cuffs for irrigation purposes during minimal invasive surgery.

*Reusable*

**Transparent Netting**
- allows clear view on the fluid bag and the fluid level

**Design**
- pocket design with zip

**Manometer**
- precision manometer
- precise pressure range from 0-300 mmHg

**Hand Inflator**
- large volume allows quick inflation
- with release valve for pressure control

*Reusable*
- bladder is replaceable

**MANOMETER 300 mmHg**

- Precision manometer
  - REF 20-17-301

**HAND INFLATOR**

- With release valve
  - REF 51-10-666

- With three-way stop cock
  - REF 51-03-666

- With color coded pressure gauge and three-way stop cock
  - REF 51-02-666
AUTOMATIC PRESSURE INFUSORS

For the use with pressure infusion cuffs for automatic irrigation purposes during minimal invasive surgery.

Precision Pressure Regulator
• very precise pressure regulation
• maintains selected pressure and guarantees automatic compensation
• limits pressure to max. 300 mmHg

Protection Cover
• protects the device from liquid and damage

Coil Extension Hose
• firmly connected to the device
• with male Luer Lock connector

Universal Clamp
• horizontal or vertical position for attachment to drip stand or rail

Pressure Infusor 100
for compressed air
with single channel

<table>

Pressure Infusor 200
for compressed air
with switch for the connection of two pressure infusion cuffs, complete with pressure hose (400 cm / 13 ft.)
