TOURNIQUET CUFFS
Cuff Design
Single- and Double Cuffs in all sizes, for both straight and contour shapes and in reusable and single use versions

Features

Straight Shape
- Cylindrical design
- Does not show any difference in diameter between proximal and distal part
- Large hook and loop fastener for reliable cuff fixation
- For small or midsize upper extremity

Contour Shape
- Arced design with a smaller diameter distally than proximally when applied
- Occludes the blood flow at lower pressures due to an improved fit to the extremity
- For lower conical shaped extremity “mostly”
- Large hook and loop fastener for reliable cuff fixation
- Recommended when the extremity is particularly muscular and for use on obese patients to avoid the risk of mechanical shearing
