“CICO” can’t intubate, can’t oxygenate

ScalpelCric
A surgical set for cricothyrotomy according to the scalpel technique
ScalpelCric has been developed to match the latest recommendations from the DAS (Difficult Airway Society) 2015 guidelines. Based on the simple description of ‘stab, twist, bougie, tube’ the ScalpelCric is meant to facilitate the execution of the scalpel technique.
The set is packed in a specific sterile pouch, ready to use.
Pack size 22 (L) x 13 (W) x 4 (H) cm

Set content
1  Scalpel #10
2  14 Fr bougie (40 cm)
3  6.0 mm cuffed tube
4  Extension tubing with suction capability
5  Syringe 10 ml
6  Necktape for tube fixation

1 Adjustable flange
2 Thin walled, low pressure cuff
3 Smooth tip for ease of insertion
References

“Anaesthetists must learn a scalpel technique and have regular training to avoid skill fade.”
Baker PA, Weller JM, Greenland KB, Riley RH, Merry AF. Education in airway management. Anaesthesia 2011; 66 (Suppl 2): 101–11

“Training should be repeated at regular intervals to ensure skill retention.”
